

Enrichment Session 2

Dates: October 16, 23, 30, November 6, & November 13

Cost: \$95- The price reflects a 5 week session

Classes:

MOVE IT! with Rebecca Krezman

Your kids will improve their fitness, learn about sportsmanship and have TONS of fun in this class. Obstacle courses, sports drills, jogging and games ...every week will be different to keep students brains interested and their bodies challenged. The last class will be a special Parkour Class by Free Flow. Wear athletic shoes and clothes you can move in.

Art with Dana Ross

In our first session, I watched fear & hesitation lessen with every class time. I saw a more responsive taking-up of the project we were working on. And... I heard more of the honest telling that happens whenever the human begins to create! I am so excited to bring a deeper level of Seeing as we begin to seriously consider the work of artist Albrecht Durer. I will work closely with his rhinoceros piece, and branch out from there. By the way, the Crocker Art Gallery will begin a lovely exhibition of Durer's work starting on November 3rd..... You needn't travel to Europe to enjoy his art!

The Science of Toys and Candy by Star Nova

Do you like candy? Do you like playing with toys? How about science? If you answered yes to any of these questions then this is the perfect class for you! Join us as we take a look at your favorite candies and toys and see how they can become a scientific wonder. You will never look at candy or toys the same way! In this class we are going to be on a six-week adventure of fun and learning and finding science in candy and toys.

Food Science by Star Nova

Love food? Love science? Let's mix it all together in Food Science! Explore Molecular Gastronomy (Food Science), where you will take ingredients and make foods in ways you would never have imagined. In this class, we will explore new recipes and new techniques to create tasty dishes of the future.

Please detach and return to the office
